Sensory systems and transcriptional regulation in Escherichia coli

Georgette Femerling , Socorro Gama–Castro , Paloma Lara , Daniela Ledezma–Tejeida , Víctor H Tierrafría , Luis José Muñiz , César Bonavides–Martínez and Julio Collado–Vides *

Systematic Review, Front. Bioeng. Biotechnol. – Synthetic Biology

Received on: 26 Nov 2021 Edited by: Rodolfo García–Contreras ✉Contact

Manuscript ID: 823240

Research Topic: Molecular Engineering of Sensory Mechanisms in Bacteria for Biosensing Technologies and Novel Tools for Microbial Engineering

Keywords: signal, gene regulation, sensory–response genetic units, Feedback, biosensor, Transcriptional regulatory network, E. coli, transcription factor

Comment:

Dear Editor,

Thank you for considering me to review this MSS but after looking at the manuscript I have realized it isn't under my domain of expertise.
Thus without further ado, I withdraw myself from reviewing this MSS.
I hope you would find someone with closer experience to the content of topic.

Sincerely,
–Kalyani
