Welcome to the Review Editor Board

Dear Dr Dhusia,

We are delighted to welcome you as Review Editor on the Editorial Board of Biological Modeling and Simulation (specialty section of Frontiers in Molecular Biosciences and Frontiers in Applied Mathematics and Statistics).

As part of our trusted network of experts, Review Editors typically review 5-10 manuscripts per year (depending on your availability, the journal and your area of expertise), and are acknowledged on all manuscripts they endorse for publication. Here are the next steps to get started:

- Re-familiarize yourself with the [terms of the Review Editor role](#)
- [Complete your Loop profile and confirm your publications](#) to keep your profile up to date with your latest publications.
- Read through the review platform step-by-step guidelines [here](#)

Submitting your own work to the journal is welcomed and encouraged. Your contributions will serve as an important foundation for the journal, showing support and setting a quality standard. Please note that your manuscripts will be reviewed according to the same criteria as those from other authors.

You can further assist in the strategic direction of the Journal by nominating emerging themes for potential article collections (Research Topics). Research Topics are managed by leading researchers to showcase emerging or important research, or even to develop and define new multidisciplinary research areas. If you would like to suggest a topic we should feature, please do not hesitate to send us your idea.

We look forward to working with you on the further development of the journal, and please do not hesitate to contact us should you have any questions in the meantime.

Kind regards, Your Frontiers in Molecular Biosciences team Frontiers | Editorial Office - Publishing Development [Avenue du Tribunal Fédéral 34](#) 1005 Lausanne, Switzerland Journal T 41 21 518 91 06 www.frontiersin.org | twitter.com/FrontiersIn For technical issues, please contact our IT Helpdesk support@frontiersin.org or visit our Frontiers Help Center helpcenter.frontiersin.org

Learn more about your role:

- As a Review Editor, you are anonymous during the peer-review process, though you will be acknowledged on all manuscripts you endorse. Note that your name will not be disclosed should you decide not to endorse a manuscript.

- When you receive a review invitation you also have the option to decline - this will ensure you receive no reminders for that invitation.

- Please ensure you do not accept any assignment where you have a potential conflict of interest: our guidelines make clear how these are defined.

If you encounter any technical issue, contact support@frontiersin.org, with qjiOT9kYqj2w8OO as reference.
